

## Hardev Staff Impression

Hardev's huge smile and kind facial features are the first thing you notice about him. He has a rounded face, rosy cheeks, a nice brow line, and beautiful big brown eyes. He has a gorgeous skin tone and thick, salt-and-pepper black hair. He's an active person and has a medium build with a strong upper body.

Hardev is very intelligent and dedicated; he has completed many years of schooling with above average grades. Hardev majored in Zoology and Biochemistry and went on to become an MD specializing in chronic pain management. Hardev is caring, compassionate, confident and approachable. All these traits make him an excellent physician, and we are very lucky to have him in our donor program.
