

Open Donor: Phuong

Staff Impression

Phuong has lovely olive skin and a full head of straight black hair. His eyes are a dark-brown that look almost black in some lights. The shape of his eyes resembles that of an almond, and the outer corners turn up ever so slightly. All of Phuong's facial features are symmetrically placed, and his high and defined cheek bones give his face a perfect square shape. Phuong also is very physically fit, walking rather than driving as much as possible.

Phuong enjoys everything from fencing and to Japanese pop culture. He appreciates all of the simple things in life and likes to sit back and observe the world around him. Phuong maintains a quiet and reserved demeanor but shows his quirky sense of humor after a bit. One day he hopes to travel around the world. Phuong is a wonderful donor!
