

Open Donor: Morgan

Staff impression

Morgan is a very pleasant and accomplished individual. He speaks three different languages, loves to travel, and graduated in the top tenth percentile of his class, going on to complete his Medical Doctorate.

He has an athletic build reflective of his active lifestyle, which includes golf and tennis on a regular basis. Morgan has very symmetrical facial features with big brown eyes, and a beautiful medium toned complexion.

The main reason Morgan became a physician is because he wanted to be able to help others, which is also reflective of his intentions as a donor. He is a very polite and caring person making him a joy for us to work with.
