

Kace (12554) Staff Impression

Kace is a handsome, well-rounded donor with a warm, likable personality. He has a rectangular face with full lips, high cheekbones, a small rounded nose, and dark eyes. His physique is lean, muscular, and athletic from regular weightlifting, soccer, and living an active lifestyle.

Kace is curious, thoughtful, genuine, and optimistic. He is an engaging conversationalist who doesn't shy away from deep conversations. He is multi-lingual, well-cultured, and is a talented musician who plays saxophone and piano in addition to being a vocalist. We have enjoyed having him in our program and every opportunity to chat with him when he is at the clinic.
